

Sustainable Team Leadership

Level 3 Apprenticeship

Leading Teams Toward a Greener Future

We personalise the learning experience and enhance knowledge and skills development

This programme equips team leaders with the essential skills to embed sustainability into daily operations and team practices. It combines practical leadership techniques with sustainability management, creating high-performing teams that drive environmental responsibility and support organisational net-zero ambitions.

Programme Overview

This comprehensive programme develops team leaders who can:

- Champion sustainable practices within their teams and across the organisation.
- Implement environmental initiatives that reduce carbon footprint and waste in daily operations.
- Lead behaviour changes to foster a culture of environmental awareness and responsibility.
- Monitor and report on sustainability metrics and drive continuous environmental improvement.
- Manage resources efficiently to minimise environmental impact while maintaining operational effectiveness.
- Navigate compliance with environmental legislation and organisational sustainability commitments.
- Engage stakeholders on sustainability goals and build partnerships for environmental action.

By 2030, organisations must demonstrate significant progress toward net-zero targets. Leaders who can embed sustainability into team operations will be essential to achieving these goals and ensuring long-term business resilience.

Our intuitive delivery methods underpin the trends and spirit of the UK's economic climate which positively complement your organisation's Growth, Vision, and Success.

Apprenticeship Level: 3

Funding £5000

Duration 12 months + 3 EPA

Workshops:

Delivered over 12 months, each workshop integrates CMI sustainability management principles with team leadership skills
